

## REMARKS

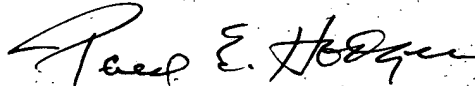

The examiner has noted that the previously submitted amendment to the specification at page 11, line 10 fails to provide the full text of the replacement paragraph with appropriate indication of which portions are to be added and deleted, and that it is the newly added Figure 12, not 10 that depicts the weapon 100, etc.

The amendment to the specification presented herewith sets forth an addition to the paragraph beginning at page 10 line 28 of the specification. The newly added language is underlined. No deletions have been made to this paragraph.

In the language added to the paragraph in question, reference is made to Figure 12, not Figure 10.

Reconsideration of the application and progression of the application to issue of Letters Patent are respectfully requested.

Respectfully submitted,

Paul E. Hodges
